Financial Statements for the year ended 30 June 2013

Accounting Officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the financial statements and were given unrestricted access to all financial records and related data.

The financial statements have been prepared in accordance with South African Statements of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 June 2014 and, in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The municipality's operations depend on a number of sources of revenue ranging from National Government to its own sources and donations. There are no signs or indications that any of these sources will be significantly curtailed. As such, the annual financial statements are prepared on the basis that the municipality is a going concern and that the municipality has neither the intention nor the need to liquidate or curtail materially the scale of the municipality.

Although the accounting officer is primarily responsible for the financial affairs of the municipality, he is supported by the municipality's external auditors.

The external auditors are responsible for independently reviewing and reporting on the municipality's financial statements. The financial statements have been examined by the municipality's external auditors and they will be presented based on their review.

The financial statements set out on pages 8 to 72, which have been prepared on the going concern basis, were approved by the accounting officer on 30 August 2013.

Mr. M. Mogale Accounting Officer

Financial Statements for the year ended 30 June 2013

Accounting Officer's Report

The accounting officer submits his report for the year ended 30 June 2013.

Review of activities

Main business and operations

The municipality is engaged in provision of municipal services in terms of the Municipal Finance Management Act no.56 of 2003 and Municipal Systems Act No.32 of 2000. and operates principally in South Africa.

The operating results for the year were satisfactory for the following reasons:

- (a) The municipality recorded a net surplus of R11 543 026 (2012: surplus R1 907 263
- (b) The municipality's contribution towards total income remained almost constant.

Proportion of income generated/raised

Service charges	23% 13 3	349 179
Grants and subsidies	60% 34 5	49 728

Going concern

Other Income

Fines

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

5%

2 924 991

4 900 990

As indicated to earlier on, the ability of the municipality to continue as a going concern is dependent on a number of factors. The most significant of these is that the accounting officer continues to procure funding for its on-going operations.

Subsequent events

The accounting officer is not aware of any matter or circumstance arising since the end of the financial year.

Accounting Officer & Other Relevant Officials's interest in contracts

The municipality has a policy relating to declaration of interest in contracts and other related transactions. This was adhered to in that relevant officials with interests in SCM related transactions declared (both potential and existing) declared their interests.

Accounting policies

The annual financial statements were prepared in accordance with the prescribed Standards of Generally Recognised Accounting Practices (GRAP Reporting Framework) issued by the Accounting Standards Board asthe prescribed framework by National Treasury.

Financial Statements for the year ended 30 June 2013

Accounting Officer's Report

6. Accounting Officer

The accounting officer of the municipality during the year and to the date of this report is as follows:

Name Nationality
Mr. M. Mogale South African

7. Corporate governance

General

The accounting officer is committed to business integrity, transparency and professionalism in all his activities. As part of this commitment, the accounting officer supports the highest standards of corporate governance and the ongoing development of best practice.

The municipality confirms and acknowledges its responsibility to total compliance with the Code of Corporate Practices and Conduct ("the Code") laid out in the King Report on Corporate Governance for South Africa 2002. The accounting officer discuss the responsibilities of management in this respect, at Council meetings and monitor the municipality's compliance with the code on a regular basis.

Council

The Council:

- retains full control over the municipality, its plans and strategy;
- acknowledges its responsibilities as to strategy, compliance with internal policies, external laws and regulations, effective risk management and performance measurement, transparency and effective communication both internally and externally by the municipality;

Remuneration

The upper limits of the remuneration of the councillors are determined in terms of the Government Notices issued by the Minister of Co-operative Governance and Traditional Affairs, as required of him by the Remunerations of Public Office Bearers Act No. 20 of 1998.

Committee meetings

The accounting officer meets on a regular basis with the Mayor and Chairpersons of Portfolio Committees.

Portfolio Committee Chairpersons have access to all members of management (Section 57 Managers) of the municipality.

Audit and risk committee

The Chairperson of the audit committee is an independent audit committee member. The committee met on a regular basis during the financial year to review matters necessary to fulfil its role.

In terms of Section 166 of the Municipal Finance Management Act, Pixley Ka Seme District Municipality must appoint members of the shared Audit Committee. Thus, more information with regards to the composition of the shared audit committee, its operations and sub-committees will be covered in the district municipality's' annual financial statements.

Internal audit

The municipality has a shared internal audit function, based at the district municipality (as highlighted above). This is in compliance with the Municipal Finance Management Act, 2003, as it is a permitted arrangement.

Bankers

The municipality's bankers did not change during the current year.

9. Auditors

Auditor-General of South Africa will continue to audit the books of the municipality into the foreseable future.

Accounting Officer's Report

0. Non compliance with applicable legislation	
Significant non-compliance with various legislations have been properly disclosed in the notes to the financial statements.

Accounting Policies

1. Presentation of Financial Statements

The financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

These financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention unless specified otherwise. They are presented in South African Rand.

A summary of the significant accounting policies, which have been consistently applied, are disclosed below.

These accounting policies are consistent with the previous period.

1.1 Statements and Interpretations Not Yet Effective

GRAP Standards

At the date of authorisation of these Annual Financial Statements, the following standards and interpretations were in issue but not yet effective and have not been early adopted by the municipality:

- GRAP 25 Employee Benefits;
- GRAP 20 Related Party Disclosures;
- GRAP 105 Transfer of Functions Between Entities Under Common Control;
- GRAP 106 Transfer of Functions Between Entities Not Under Common Control;
- GRAP 107 Mergers;

•

Regarding GRAP 105, 106, 107, 20 and 25, there are not effective dates as yet as the Minister of Finance has not yet determined the effective dates. The nature of the impending changes, when the municipality intends to adopt them and the likely impact on the financial statements will be discussed or determined when the Minister of Finance determines the effective date.

1.2 Significant judgements and sources of estimation uncertainty

In preparing the financial statements, management is required to make estimates and assumptions that affect the amounts presented in the financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the financial statements.

These estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised, if the revision affects only that period or in the period of the revision and future periods if the revision affects both the current and future periods.

In the process of applying the municipality's policies, management has made the following significant accounting judgements, estimates and assumptions, which have the most significant effect on the amounts recognised in the financial statements and these are consistent with the previous period:

Impairment of trade and other receivables

The calculation in respect of the impairment of debtors is based on an assessment of the extent to which debtors have defaulted on payments already due, and an assessment of their ability to make payments based on their creditworthiness. This was performed per debtor per service.

Allowance for slow moving, damaged and obsolete inventory

An allowance for inventory to write inventory down to the lower of cost or net realisable value. Management have made estimates of the selling price and direct cost to sell on certain inventory items. The write down is included in the operation surplus note26

Provisions and contingent liabilities

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 17 - Provisions.

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.2 Transfer of functions between entities under common control (continued)

Post -retirement medical aid benefit

The cost of post-retirement medical aid benefit is determined using actuarial valuations. The actuarial valuation involves making assumptions about discount rates, expected rates of return on assets, future salary increases, mortality rates and future pension increases. Due to the long-term nature of these plans, such estimates are subject to significant uncertainty. Additional information is disclosed in Note 6.

Additional information is disclosed in Note 5.

Classification as investment property

The municipality has reviewed its property portfolio and determined which items of land and buildings are held to earn rental revenue or for capital appreciation. Land and buildings fulfilling these requirements have been classified as investment property, whilst the remainder of the portfolio have either been classified as property, plant and equipment or inventory depending on management's intention in dealing with these properties.

Depreciation and the carrying value of items of property, plant and equipment

The estimation of the useful lives of assets is based on management's judgement. Management considers the impact of technology, availability of capital funding, service requirements, and required return on assets to determine the optimum useful life expectation, where appropriate. The estimation of residual values of assets is also based on management's judgement whether the assets will be sold or used to the end of their useful lives, and what their condition will be at that time.

1.3 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services or for
- administrative purposes, or
- sale in the ordinary course of operations.

Owner-occupied property is property held for use in the production or supply of goods or services or for administrative purposes.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.3 Investment property (continued)

Fair value

Subsequent to initial measurement investment property is measured at fair value.

The fair value of investment property reflects market conditions at the reporting date.

A gain or loss arising from a change in fair value is included in net surplus or deficit for the period in which it arises.

If the entity determines that the fair value of an investment property under construction is not reliably determinable but expects the fair value of the property to be reliably measurable when construction is complete, it measures that investment property under construction at cost until either its fair value becomes reliably determinable or construction is completed (whichever is earlier). If the entity determines that the fair value of an investment property (other than an investment property under construction) is not reliably determinable on a continuing basis, the entity measure that investment property using the cost model (as per the accounting policy on Property, plant and equipment). The residual value of the investment property is then assumed to be zero. The entity apply the cost model (as per the accounting policy on Property, plant and equipment) until disposal of the investment property.

Once the entity becomes able to measure reliably the fair value of an investment property under construction that has previously been measured at cost, it measures that property at its fair value. Once construction of that property is complete, it is presumed that fair value can be measured reliably. If this is not the case, the property is accounted for using the cost model in accordance with the accounting policy on Property, plant and equipment.

1.4 Property, plant and equipment

Property, plant and equipment are initially recognised at cost on its acquisition date or in the case of assets acquired by grant or donation, deemed cost, being the fair value of the asset on initial recognition. The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located. Subsequent to initial recognition, land and buildings are carried at a revalued amount based on municipal valuations, less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Revaluations are performed by external independent valuers with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair value at the Statement of Financial Position date. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset, and the net amount is restated to the revalued amount of the asset. Subsequently all property plant and equipment, excluding land and building and including for Infrastructure Assets, are measured at cost, less accumulated depreciation and accumulated impairment losses.

Where items of property, plant and equipment have been impaired, the carrying value is adjusted by the impairment loss, which is recognised as an expense in the Statement of Financial Performance in the period that the impairment is identified.

Subsequent expenditure relating to property, plant and equipment is capitalised if it is probable that future economic benefits or potential service delivery of the assets are enhanced in excess of the originally assessed standard of performance. If the expenditure only restores the originally assessed standard of performance, it is regarded as repairs and maintenance, and is expensed.

The municipality maintains and acquires assets to provide a social service to the community, with no intention of disposing of the assets for any economic gain, and thus no residual values are determined other than for motor vehicles.

The gain or loss arising from the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying value, and is recognised in the Statement of Financial Performance.

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

Assets held under finance leases are depreciated over their useful lives on the same basis as owned assets or, where appropriate, the term of the relevant lease, and are recognised in the Statement of Financial Performance.

Assets under construction are carried at cost. Depreciation of an asset commences when the asset is ready for its intended use.

Accounting Policies

Water craft	15
 Bins and containers 	5
 Other items of plant and equipment 	2-5

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.4 Property, plant and equipment (continued)

Impairment of property, plant and equipment

Property, plant and equipment are reviewed at each reporting date for any indication of impairment. If any such indication exists, the asset's recoverable amount is estimated. The impairment charged to the Statement of Finance Performance is the excess of the carrying value over the recoverable amount.

An impairment is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined had no impairment been recognised. A reversal of impairment is recognised in the Statement of Financial Performance.

1.5 Intangible assets

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Useful life 3-7 years

Computer software

Intangible assets are derecognised:

- on disposal; or
 - when no future economic benefits or service potential are expected from its use or disposal.

1.6 Heritage assets

Assets are resources controlled by an municipality as a result of past events and from which future economic benefits or service potential are expected to flow to the municipality.

Carrying amount is the amount at which an asset is recognised after deducting accumulated impairment losses.

Class of heritage assets means a grouping of heritage assets of a similar nature or function in an municipality's operations that is shown as a single item for the purpose of disclosure in the financial statements.

Cost is the amount of cash or cash equivalents paid or the fair value of the other consideration given to acquire an asset at the time of its acquisition or construction or, where applicable, the amount attributed to that asset when initially recognised in accordance with the specific requirements of other Standards of GRAP.

Depreciation is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Accounting Policies

and are held indefinitely for the benefit of present and future generations.

1.4	Property, plant and equipment	(continu	ed)						
Heri	tage assets are assets that have a	a cultural	environmental	historical	natural	scientific	technological	or artistic	significance

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.6 Heritage assets (continued)

An impairment loss of a cash-generating asset is the amount by which the carrying amount of an asset exceeds its recoverable amount.

An impairment loss of a non-cash-generating asset is the amount by which the carrying amount of an asset exceeds its recoverable service amount.

An inalienable item is an asset that an municipality is required by law or otherwise to retain indefinitely and cannot be disposed of without consent.

Recoverable amount is the higher of a cash-generating asset's net selling price and its value in use.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Value in use of a cash-generating asset is the present value of the future cash flows expected to be derived from an asset or cash-generating unit.

Value in use of a non-cash-generating asset is the present value of the asset's remaining service potential.

1.7 Financial instruments

Classification

Financial instruments are recognised when the municipality becomes party to the contractual provisions of the instrument and are initially measured at fair value plus, in the case of a financial asset or liability, not at fair value, transaction costs that are directly attributable to the acquisition or issue of the financial asset or liability. The municipality classifies financial assets and financial liabilities into the following categories:

- Financial assets and liabilities at fair value through surplus or deficit
- Financial assets and liabilities at amortised cost .
- Financial Assets and Liabillities at cost

Classification depends on the purpose for which the financial instruments were obtained/incurred and takes place at initial recognition. Classification is re-assessed on an annual basis.

Initial recognition and measurement

Financial instruments are recognised initially when the municipality becomes a party to the contractual provisions of the instruments.

The municipality classifies financial instruments, or their component parts, on initial recognition as a financial asset, a financial liability or an equity instrument in accordance with the substance of the contractual arrangement.

Financial instruments are measured initially at fair value.

Transaction costs on financial instruments at fair value through surplus or deficit are recognised in surplus or deficit.

Subsequent measurement

Financial instruments at fair value through surplus or deficit are subsequently measured at fair value, with gains and losses arising from changes in fair value being included in surplus or deficit for the period.

Net gains or losses on the financial instruments at fair value through surplus or deficit include dividends and interest.

Dividend income is recognised in surplus or deficit as part of other income when the municipality's right to receive payment is established.

Financial instruments at cost are subsequently measured at the initial recognition amount.

Financial instruments at amortised cost are subsequently measured at amortised cost, using the effective interest method, less accumulated impairment losses.

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.7 Financial instruments (continued)

Impairment of financial assets

At each end of the reporting period the municipality assesses all financial assets, other than those at fair value through surplus or deficit, to determine whether there is objective evidence that a financial asset or group of financial assets has been impaired.

For amounts due to the municipality, significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy and default of payments are all considered indicators of impairment.

In the case of equity securities classified as available-for-sale, a significant or prolonged decline in the fair value of the security below its cost is considered an indicator of impairment. If any such evidence exists for available-for-sale financial assets, the cumulative loss - measured as the difference between the acquisition cost and current fair value, less any impairment loss on that financial asset previously recognised in surplus or deficit - is removed from equity as a reclassification adjustment and recognised in surplus or deficit.

Impairment losses are recognised in surplus or deficit.

Impairment losses are reversed when an increase in the financial asset's recoverable amount can be related objectively to an event occurring after the impairment was recognised, subject to the restriction that the carrying amount of the financial asset at the date that the impairment is reversed shall not exceed what the carrying amount would have been had the impairment not been recognised.

Reversals of impairment losses are recognised in surplus or deficit except for equity investments classified as available-for-sale.

Impairment losses are also not subsequently reversed for available-for-sale equity investments which are held at cost because fair value was not determinable.

Financial instruments designated as at fair value through surplus or deficit

The municipality measures a financial instrument at fair value if it is:

- a derivative:
- a combined instrument designated at fair value, i.e. an instrument that includes a derivative and a non-derivative host contract;
- held-for-trading;
- a non-derivative instrument with fixed or determinable payments that is designated at initial recognition to be measured at fair value;
- an investment in a residual interest for which fair value can be measured reliably; and
- · other instruments that do not meet the definition of financial instruments at amortised cost or cost.

Receivables from exchange transactions

Trade receivables are measured at initial recognition at fair value, and are subsequently measured at amortised cost using the effective interest rate method. Appropriate allowances for estimated irrecoverable amounts are recognised in surplus or deficit when there is objective evidence that the asset is impaired. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments (more than 90 days overdue) are considered indicators that the trade receivable is impaired. The allowance recognised is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the effective interest rate. Subsequent recoveries of amounts previously written off are credited against operating expenses in surplus or deficit. Interest is charged on overdue amounts.

Amounts receivable within 12 months from the date of reporting are classified as current.

Trade and other receivables are classified as loans and receivables.

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.7 Financial instruments (continued)

Payables from exchange transactions

Trade payables are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method.

Liabilities for annual leave (accrued leave pay) and annual bonus are recognised as they accrue to employees. Accrual is based on the potential liability of the municipality. Liabilities for goods and services rendered to the municipality before year end are accrued on management's estimate if the invoice or statement have not not been issued.

Cash and cash equivalents

Cash includes cash on hand (including petty cash) and cash with banks (including call deposits). Cash equivalents are short-term highly liquid investments that are readily convertible to a known amount of cash and are held with registered banking institutions with maturities of three months or less. They are subject to an insignificant risk of changes in value.

For purposes of the Cash Flow Statement, cash and cash equivalents comprise cash on hand and deposits held on call with banks, net of bank overdrafts. The municipality categorises cash and cash equivalents as financial assets: loans and receivables. Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdrafts are expensed as incurred. Bank overdrafts are shown within borrowings in current liabilities on the Statement of Financial Position. Cash and cash equivalents and bank borrowings are subsequently recorded at amortised cost.

Bank overdraft and borrowings

Bank overdrafts and borrowings are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method. Any difference between the proceeds (net of transaction costs) and the settlement or redemption of borrowings is recognised over the term of the borrowings in accordance with the municipality's accounting policy for borrowing costs.

Financial liabilities and equity instruments

Financial liabilities are classified according to the substance of contractual agreements entered into. Trade and other payables are stated at their nominal value. Equity instruments are recorded at the amount received, net of direct issue costs.

Gains and losses

A gain or loss arising from a change in a financial asset or financial liability is recognised as follows:

• For financial assets and financial liabilities carried at amortised cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, and through the amortisation process.

Derecognition

Financial assets

Financial assets are recognised when the rights to receive cash flows from the assets have expired or have been transferred and the municipality has transferred substantially all risks and rewards of ownership, or when the enterprise loses control of contractual rights that comprise the assets. Financial liabilities are derecognised when the obligation specified in the contract is discharged or cancelled or expire

Financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires.

1.8 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.8 Leases (continued)

Finance leases - lessor

The municipality recognises finance lease receivables as assets on the statement of financial position. Such assets are presented as a receivable at an amount equal to the net investment in the lease.

Finance revenue is recognised based on a pattern reflecting a constant periodic rate of return on the municipality's net investment in the finance lease.

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset.

Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

1.9 Inventories

Inventories consists of raw materials, water and consumables. Inventories are initially measured at cost except where inventories are acquired at no cost, or for nominal consideration, then their costs are fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for;

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. Cost is generally determined using the firstin- first-out principle except where stated otherwise.

Some of the inventory items are used for surrogating purposes. However, due to the fact that some of the components of these inventories would have been removed or faulty, the value of the inventories cannot be determined. As such these inventory items have no value attached to them.

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.9 Inventories (continued)

Unsold properties are measured at the lower of cost and net realisable value. Cost is primarily determined by reference to the valuation roll or total cost of servicing the land.

Water inventory

Water is measured at the lower of purifying cost and net realisable value, insofar as it is stored and controlled in reservoirs and pipe network at year end.

Readings of water levels are taken at year-end, which is quantified at the above value.

1.10 Going concern assumptions

The annual financial statements have been prepared on the assumption that the municipality will continue to operate on a going concern basis for at least the next twelve months.

1.11 Impairment of Property, Plant and Equipment

Cash-generating assets are those assets held by the municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets held with the primary objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- (a) the period of time over which an asset is expected to be used by the municipality; or
- (b) the number of production or similar units expected to be obtained from the asset by the municipality.

Criteria developed by the municipality to distinguish cash-generating assets from non-cash-generating assets are as follow:

Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Irrespective of whether there is any indication of impairment, the municipality also test a cash-generating intangible asset with an indefinite useful life or a cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.11 Impairment of Property, Plant and Equipment (continued)

Value in use

Value in use of an asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

Any impairment loss of a revalued cash-generating asset is treated as a revaluation decrease.

When the amount estimated for an impairment loss is greater than the carrying amount of the cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standard of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the asset is adjusted in future periods to allocate the asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Reversal of impairment loss

The municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for any asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss is recognised immediately in surplus or deficit.

Any reversal of an impairment loss of a revalued cash-generating asset is treated as a revaluation increase.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

1.12 Incomplete Construction Work (Work In Progress)

Incomplete construction work is stated at historical costs. Historical costs relates to accumulation of capital amounts incurred to the date of commission. Depreciation will only commence when the asset is available for use, after commissioning.

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.13 Employee benefits

Short-term employee benefits

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted. Liabilities relating to such benefits that are unpaid at year-end are measured at the undiscounted amount that the municipality expects to pay in exchange for that service and had accumulated at the reporting date

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

The expected cost of performance bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance and the obligation can be estimated reliably.

Defined contribution plans

The municipality's and its employees contributes to various pension, provident and retirement funds and its Councillors contribute to the Pension Fund for Municipal Councillors. The retirement benefit are calculated in accordance with the rules of the funds. Full actuarial valuations are performed by the relevant funds on a regular basis as per the requirement of the various funds. Current contributions are recognised in surplus or deficit in the period in which the service is rendered by the relevant employees. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in future payments is available.

Some of the various funds that the municipality contributes to are multi-employer defined benefit plans but they are accounted for as defined contribution plans. This is so because of the nature of these funds and the fact that the assets are not specifically associated to meet the obligations in respect of individual employers in terms of paragraph 30 of IAS 19. Thus, there is no consistent and reliable basis for allocating the obligations, plan assets and costs to individual municipalities participating in the plan. The contributions to the fund obligations for the payment of retirement benefits are expensed in the year it becomes payable. These multi-employer plans are actuarially valued annually on a national or provincial basis, using the projected unit credit method. Deficits, if any, are recovered through lumpsum payments or increased future contributions on a proportional basis from all participating municipalities.

Defined benefit plans

The cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuations being carried out at the end of each reporting period. Actuarial gains and losses that exceed 10 per cent of the greater of the present value of the municipality's defined benefit obligation and the fair value of plan assets as at the end of the prior year are amortised over the expected average remaining working lives of the participating employees.

The municipality provides certain post-retirement medical benefits by funding the medical aid contributions of certain retired members of the municipality. According to the rules of all of the medical aid funds with which the municipality is associated, a member is entitled to remain a continued member of the medical aid fund on retirement, in which case the municipality is liable for a certain portion of the medical aid membership fee. These medical aid funds are classified as defined benefit plans.

The current service cost is recognised as a period expense in the statement of financial performance and is matched to the benefit received during the working life of the employee, the current service cost includes the expense for benefits received by the employee currently in service and the cost of funding the employee when no longer in service.

Where some of the employees are not members of any qualifying medical aid scheme as at reporting date, the municipality accrues 50% of such potential liability. This management estimate is meant to cater for employees who are likely to join the qualifying medical schemes in future but before retirement.

1.14 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.14 Provisions and contingencies (continued)

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Provisions are not recognised for future operating surplus.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 39.

Decommissioning, restoration and similar liability

Changes in the measurement of an existing decommissioning, restoration and similar liability that result from changes in the estimated timing or amount of the outflow of resources embodying economic benefits or service potential required to settle the obligation, or a change in the discount rate, is accounted for as follows:

If the related asset is measured using the cost model, the related depreciation, based on the estimated useful life of the landfill site, is recognised immediately in surplus or deficit.

If the related asset is measured using the revaluation model:

- changes in the liability alter the revaluation surplus or deficit previously recognised on that asset, so that:
 - a decrease in the liability is credited directly to revaluation surplus in net assets, except that it is recognised in surplus or deficit to the extent that it reverses a revaluation deficit on the asset that was previously recognised in surplus or deficit; and
 - an increase in the liability is recognised in surplus or deficit, except that it is debited directly to revaluation surplus in net assets to the extent of any credit balance existing in the revaluation surplus in respect of that asset;

The provision (liability) is periodically discounted or interest is unwound on a yearly basis. The periodic unwinding of the discount is recognised in surplus or deficit as a finance cost as it occurs.

1.15 Revenue from exchange transactions

Revenue is derived from a variety of sources which include rates levied, grants from other tiers of government and revenue from trading activities and other services provided.

Revenue from exchange transactions refers to revenue that accrued to the municipality directly in return for services rendered/goods sold, the value of which approximated the consideration received or receivable.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of value added tax, trade discounts, returns and volume rebates.

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.15 Revenue from exchange transactions (continued)

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Interest, royalties, dividends & other income

Interest earned on investments is recognised on a time proportion basis that takes into account the effective yield on the investments. Interest earned on outstanding debtors is recognised on a time proportion basis.

Royalties are recognised as they are earned in accordance with the substance of the relevant agreements.

Dividends, or their equivalents are recognised, in surplus or deficit, when the municipality's right to receive payment has been established.

Service charges relating to electricity, water and sanitation are based on consumption. Meters are read and billed on a monthly basis and revenue is recognised when invoiced. Estimated consumptions are made monthly when meters have not been read. The estimates of consumption are recognised as revenue when invoiced. Adjustments to estimates of consumption are made in the invoicing period when meters have been read. These adjustments are recognised as against or for revenue in the invoicing period.

Income from agency services: Income from agency services is recognised on a monthly basis once the income collected/received on behalf of agents has been quantified. The income is recognised in terms of the agency agreement.

1.16 Revenue from non-exchange transactions

Non-exchange transactions are defined as transactions where the entity receives value from another entity without directly giving approximately equal value in exchange.

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.16 Revenue from non-exchange transactions (continued)

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Rates, including collection charges and penalties interest

Revenue from rates, including collection charges and penalty interest, is recognised on a monthly basis when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality:
- the amount of the revenue can be measured reliably; and
- there has been compliance with the relevant legal requirements.

Revenue from rates is recognised when the legal entitlement to this revenue arises. A site rating system is applied. In terms of this system, assessment rates are levied on the land value of the property. A composite rating system charging different rate tariffs is employed. Rebates are granted to certain categories of ratepayers and are deducted from revenue. Changes to property values during a reporting period are valued by a suitably qualified valuator and adjustments are made to rates revenue, based on a time proportion basis. Adjustments to rates revenue already recognised are processed or additional rates revenue is recognised.

Fines

Revenue from the issuing of fines is recognised when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the amount of the revenue can be measured reliably.

The municipality has two types of fines: spot fines and summons. There is uncertainty regarding the probability of the flow of economic benefits or service potential in respect of spot fines as these fines are usually not given directly to an offender. Further legal processes have to be undertaken before the spot fine is enforceable. In respect of summons the public prosecutor can decide whether to waive the fine, reduce it or prosecute for non-payment by the offender. By nature, a reliable estimate cannot be made of revenue from summons and spot fines. The revenue from fines is therefore recognised when the public prosecutor or ticketed person pays over to the entity the cash actually collected on summons and/or spot fines (on receipt basis).

Levies

Levies are recognised as revenue when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the amount of the revenue can be measured reliably.

Levies are based on declarations completed by levy payers. The estimate of levies revenue when a levy payer has not submitted a declaration are based on the following factors:

- the extent and success of procedures to investigate the non-submission of a declaration by defaulting levy payers;
- internal records maintained of historical comparisons of estimated levies with actual levies received from individual levy payers;
- historical information on declarations previously submitted by defaulting levy payers; and
- the accuracy of the database of levy payers as well as the frequency by which it is updated for changes.

Changes to estimates made when more reliable information becomes available are processed as an adjustment to levies revenue.

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.16 Revenue from non-exchange transactions (continued)

Unconditional grants and receipts

Government grants are recognised as revenue when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality,
- the amount of the revenue can be measured reliably, and
- to the extent that there has been compliance with any restrictions associated with the grant.

The municipality assesses the degree of certainty attached to the flow of future economic benefits or service potential on the basis of the available evidence. Certain grants payable by one level of government to another are subject to the availability of funds. Revenue from these grants is only recognised when it is probable that the economic benefits or service potential associated with the transaction will flow to the entity. An announcement at the beginning of a financial year that grants may be available for qualifying entities in accordance with an agreed programme may not be sufficient evidence of the probability of the flow. Revenue is then only recognised once evidence of the probability of the flow becomes available, which in most cases is on receipt.

Restrictions on government grants may result in such revenue being recognised on a time proportion basis. Where there is no restriction on the period, such revenue is recognised on receipt or when the Act becomes effective, which-ever is earlier.

When government remit grants on a re-imbursement basis, revenue is recognised when the qualifying expense has been incurred and to the extent that any other restrictions have been complied with.

Donations and contributions

Revenue from donations is recognised as revenue when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality:
- the amount of the revenue can be measured reliably; and
- any restrictions associated with the donation have been met

Revenue from donations is measured at the fair value of the consideration received or receivable which is the cash amount received or where the donation is in the form of property, plant and equipment, the fair value of the property, plant and equipment received or receivable.

1.17 Value Added Tax

The municipality accounts for Value Added Tax (VAT) on a cash basis. The municipality is liable to account for VAT at the standard rate of 14% in terms of section 7(1)(a) of the VAT Act in respect of supply of goods or services, except where the supplies are specifically zero-rated in terms of section 11, exempted in terms of section 12 of the VAT Act or are scoped out for VAT purposes. The municipality accounts for VAT on a monthly basis.

1.18 Pre-paid electricty

Revenue from the sale of electricity using pre-paid meter cards is recognised based on consumption.

The consumption is determined on the following trend analysis:

- During the winter season (May, June, July and August), the municipality tend to sell more units as the temperatures will be generally low.
- The municipality calculates the average sales for the four months. The resultant average units are compared to the sales for May and August for reasonableness. If the average sales in units are within a reasonable range or threshold of the May and August sales, the average is deemed reasonable. If it is not within the reasonable range obtained for the two months, reasons for the significant variances are obtained and accounted for in appropriately, which may be in the form of an adjustment to the revenue for pre-paid electricity. Thus, exceptional items are adjusted for.
- The resultant reasonable average consumption rate is used as an estimate for the consumption of pre-paid electricity for the month of June. The actual units sold in June are then compared to the estimated consumption for June

If the actual quantity sold is more than the estimated consumption for June, pre-paid electricity revenue sales for June is then based on the estimated consumption units and the excess is deferred to July of the ensuing period.

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.18 Pre-paid electricty (continued)

If the actual quantity sold in June is less than the estimated consumption for June, pre-paid electricity for June is then based on the actual units sold.

1.19 Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised as part of the cost of that asset until such time as the asset is ready for its intended use. The amount of borrowing costs eligible for capitalisation is determined as follows:

- Actual borrowing costs on funds specifically borrowed for the purpose of obtaining a qualifying asset less any investment income on the temporary investment of those borrowings.
- Weighted average of the borrowing costs applicable to the municipality on funds generally borrowed for the purpose of obtaining a qualifying asset. The borrowing costs capitalised do not exceed the total borrowing costs incurred.

The capitalisation of borrowing costs commences when all the following conditions have been met:

- expenditures for the asset have been incurred;
- borrowing costs have been incurred; and
- activities that are necessary to prepare the asset for its intended use or sale are undertaken.

When the carrying amount or the expected ultimate cost of the qualifying asset exceeds its recoverable amount or recoverable service amount or net realisable value or replacement cost, the carrying amount is written down or written off in accordance with the accounting policy on Impairment of Assets as per accounting policy number 1.11 and . In certain circumstances, the amount of the write-down or write-off is written back in accordance with the same accounting policy.

Capitalisation is suspended during extended periods in which active development is interrupted.

Capitalisation ceases when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete.

When the municipality completes the construction of a qualifying asset in parts and each part is capable of being used while construction continues on other parts, the entity ceases capitalising borrowing costs when it completes substantially all the activities necessary to prepare that part for its intended use or sale.

All other borrowing costs are recognised as an expense in the period in which they are incurred.

1.20 Comparative figures

When the presentation or classification of items in the financial statements is amended, prior period comparative amounts are reclassified. The nature and reasons for the reclassification is disclosed.

Where accounting errors have been identified in the current financial year, the correction is made retrospectively as far as it is practical and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as it is practical and the prior year comparatives are restated accordingly.

1.21 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division or permitted by the MFMA.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.22 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.22 Fruitless and wasteful expenditure (continued)

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.23 Irregular expenditure

Irregular expenditure as defined in section 1 of the PFMA is expenditure other than unauthorised expenditure, incurred in contravention of or that is not in accordance with a requirement of any applicable legislation, including -

- (a) this Act; or
- (b) the State Tender Board Act, 1968 (Act No. 86 of 1968), or any regulations made in terms of the Act; or
- (c) any provincial legislation providing for procurement procedures in that provincial government.

National Treasury practice note no. 4 of 2008/2009 which was issued in terms of sections 76(1) to 76(4) of the PFMA requires the following (effective from 1 April 2008):

Irregular expenditure that was incurred and identified during the current financial and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register. In such an instance, no further action is also required with the exception of updating the note to the financial statements.

Irregular expenditure that was incurred and identified during the current financial year and for which condonement is being awaited at year end must be recorded in the irregular expenditure register. No further action is required with the exception of updating the note to the financial statements.

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned.

Irregular expenditure that was incurred and identified during the current financial year and which was not condoned by the National Treasury or the relevant authority must be recorded appropriately in the irregular expenditure register. If liability for the irregular expenditure can be attributed to a person, a debt account must be created if such a person is liable in law. Immediate steps must thereafter be taken to recover the amount from the person concerned. If recovery is not possible, the accounting officer or accounting authority may write off the amount as debt impairment and disclose such in the relevant note to the financial statements. The irregular expenditure register must also be updated accordingly. If the irregular expenditure has not been condoned and no person is liable in law, the expenditure related thereto must remain against the relevant programme/expenditure item, be disclosed as such in the note to the financial statements and updated accordingly in the irregular expenditure register.

1.24 Internal reserves

Fair Value Adjustment Reserve

The municipality recognises all fair value adjustments for its available for sale financial instruments in equity, in the Fair Value Adjustment Reserve. When a part of the available for sale instruments are derecognised, a transfer (representing the fair value adjustment realised) is made from the reserve to the statement of financial performance.

1.25 Revaluation reserve

The surplus arising from the revaluation of property, plant and equipment is credited to a non-distributable reserve. The revaluation surplus is realised as revalued buildings are depreciated, through a transfer from the revaluation reserve to the accumulated surplus/deficit. On disposal, the net revaluation surplus is transferred to the accumulated surplus/deficit while gains or losses on disposal, based on revalued amounts, are credited or charged to the statement of financial performance.

1.26 Gratuities

The municipality provides gratuities for qualifying staff members in terms of the relevant conditions of employment. The expenditure is recognised in the statement of financial performance when the gratuity is paid.

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.27 Contigent Assets and Liabilities

Contingent liabilities represent a possible obligation that arises from past events and whose existence will be confirmed only by an occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity. A contingent liability can also arise as a result of a present obligation that arises from past events but which is not recognised as a liability either because it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation or the amount of the obligation cannot be measured with sufficient reliability.

Contingent assets represent possible assets that arise from past events and whose existence will be confirmed only by an occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in the notes to the annual financial statements.

1.28 Treatment of Administration and Other Overheads

The costs of internal support services are transferred to the various services and departments to whom resources are made available..

1.29 Conditional grants and receipts

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised.

1.30 Segmental information

Segmental information on property, plant and equipment is set out in Appendices . Other segmental information is currently exempt.

1.31 Capital Commitments

Items are classified as commitments where the Municipality commits itself to future transactions that will normally result in the outflow of resources. Capital commitments are not recognised in the statement of financial position as a liability but are included in the disclosure notes in the following cases:

- Approved and contracted commitments, where the expenditure has been approved and the contract has been awarded at the reporting date, where disclosure is required by a spesific standard of GRAP
- Approved but not yet contracted commitments, where the expenditure has been approved and the contract has yet to be awarded or is awaiting finalisation at the reporting date
- Items are classified as commitments where the municipality commits itself to future transactions that will normally
 result in the outflow of resources.
- Contracts that are entered into before the reporting date, but goods and services have not yet been received are disclosed in the disclosure notes to the financial statements.
- Other commitments for contracts are be non-cancellable or only cancellable at significant cost contracts should relate to something other than the business of the municipality.

1.32 Budget information

Municipality are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on a cash basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 01/07/2012 to 30/06/2013.

The budget for the economic entity includes all the entities approved budgets under its control.

The financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

Financial Statements for the year ended 30 June 2013

Accounting Policies

1.33 Related parties

The municipality operates in an economic sector currently dominated by entities directly or indirectly owned by the South African Government. As a consequence of the constitutional independence of the three spheres of government in South Africa, only entities within the national sphere of government are considered to be related parties.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

Only transactions with related parties not at arm's length or not in the ordinary course of business are disclosed.

A professional Valuer was engaged by the Municipality to determine the Values of the Property

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

Restrictions on the realisability of investment property or the remittance of revenue and proceeds of disposal are as follows:

Contractual obligations to purchase, construct or develop investment property or for repairs, maintenance or enhancements is as follows:

In the exceptional cases when the municipality have to measure investment property using the cost model in the Standard of GRAP on Property, Plant and Equipment when the municipality subsequently uses the fair value measurement, disclose the following:

a description of the investment property.

Investment Property

- an explanation of why fair value cannot be determined reliably,
- if possible, the range of estimates within which fair value is highly likely to lie, and
- on disposal of investment property not carried at fair value:
 - the fact that the entity has disposed of investment property not carried at fair value,
 - the carrying amount of that investment property at the time of sale, and
 - the amount of gain or loss recognised.

4. Intangible assets (continued)

Transitional provisions

Intangible assets recognised at provisional amounts

In accordance with the transitional provisions as per Directive 4 of the GRAP Reporting Framework, as disclosed in note, certain intangible assets with a carrying value of R1 (2012: R1) was recognised at provisional amounts. Carrying amounts of intangible assets carried at provisional amounts are as follows:

Due to initial adoption of GRAP 102

Sabata System 6 196 6 196

Steps taken to establish the values of intangible assets recognised at provisional amounts due to the initial adoption of GRAP 102, are that an estimate of the cost to install the system to the level of our utilisation and capacity will be obtained from the system providers. This will then be used as a basis for determing the value. This will be done by the end of the current financial period.

There were no provisional amounts retrospectively adjusted during the year.

Sabata system 6 196 6 196

The date at which full compliance with GRAP 102 is expected, is 30 June 2012.

Deemed cost

Aggregate of items valued using deemed cost 6 196 6 196

5. Employee benefit obligations

Defined benefit plan

The plan is a post employment medical benefit plan.

Post retirement medical aid plan

The municipality operates a funded post employment health care defined benefit plan for qualifying employees. Employees of the municipality are members of , LA Health, Hosmed, Bonitas, Keyhealth and SAMWUMED medical aid schemes.

The municipality is committed to pay 61% of the members' post employment medical aid contributions. Under the plan, dependents of the former employees are entitled to continued membership of their medical aid scheme upon the death of the primary member. No other post-employment benefits are provided to these employees. As at the balance sheet date, the members of the medical aid entitled to the post employment medical scheme subsidy were 66 service members and 5 pensioners.

The most recent actuarial valuation of the plan assets and the present value of the defined benefit obligations were carried out at 30 June 2013 by Liberty Specialised Insurance. The present value of the defined benefit obligation, and the related current service cost and past service costs, were measured using the Projected Unit Credit Method.

Non-current liabilities Current liabilities	(3 835 000) (2 040 000) (5 875 000) (5 286 000) (589 000)	(3 295 000) (1 963 945) (5 258 945) (4 973 134) (285 811)

Key assumptions used

The principal assumptions used for the purpose of the actuarial valuation on 30 June 2013 were as follows:

Discount rates used 8,80% 8,03% Consumer price inflation 7,80% 6,98%

Demographic Assumptions: Age between husband and wife (Active members - 4 years, Pensioners - actual age used); Proportion married (Active members - 80%, Pensioners - actual married status used) .

Decrement Assumptions: Mortality [Active members: SA(85 - 90), Pensioners: PA(90]

Data Assumptions: The following data assumptions were made due to non-availability sufficient information; (a) Dates of birth for 13 pensioners could not be obtained. It was therefore assumed that the pensioners are 66 years old; (b) Gender for 8 pensioners could not be determined. It was therefore assumed that all such pensioners are male; (c) The marital status for 6 pensioners could not be established. It was therefore assumed that the pensioners are married and the spouses are 4 years younger than the pensioners.

Continuation percentages: It was assumed that 95% of the deceased pensioners' spouses will continue with their membership.

Other assumptions - Sensitivity Analysis

The level of inflation and the discount rate were varied whilst keeping all the other assumptions constant in order to determine the impact of varying the inflation and discount rates on the liability:

			-		<u>ne</u> ercentage oint	
Inflation				6 633 000	4 892 000	
Discount Rate				6 633 000	4 904 000	
Mortality Improvements				5 668 000	6 108 000	
Amounts for the current and previous four years	are as shown below.					
	2013	2012	2011	2010		
Defined benefit obligation at end of year	5 875 000	5 258 945	5 456 063	4 712 27	6	
Interest costs	417 000	467 120	-		-	
Current service costs	268 000	198 911	-		-	

Defined contribution plan

Expected Employer Benefit Payments

It is the policy of the municipality to provide retirement benefits to all its employees. A number of defined contribution provident funds, all of which are subject to the Pensions Fund Act and some are multi-employer, exist for this purpose.

141 000

The municipality is under no obligation to cover any unfunded benefits.

Included in defined contribution plan information above, is the Multi-Employer Pension Fund contributions, which due to the fact that sufficient information is not available to enable the municipality to account for the plan(s) as a defined benefit plan(s), are accounted for as Defined Contribution Plans.

Multi-Employer and State Plans

The following are the defined benefit plans that the municipality's employees belong to:

- Municipal Council PensionFund
- Cape Joint Fund
- South African Local Authorities (SALA) Pension Fund

These are not treated as defined benefit plans as defined by IAS 19,but are accounted for as defined contribution plans. This is in line with the exemption in IAS 19 paragraph 30 which states that where information required for proper defined benefit accounting is not available in respect of multi-employer and state plans, these should be accounted for as defined contribution plans. The municipality has been unsuccessful in obtaining the necessary information to support proper defined benefit plan accounting due to restrictions imposed by the multi-employer plan. It is therefore deemed impracticable to obtain this information at a suitable level of detail.

In terms of contributions to the fund, the municipality and employee contributions are as follows:

- SALA Pension Fund Employee (8.6%); Employer (20.78%);
- SAMWU Pension Fund Employee (8.6%); Employer (18.6%)
- Metropolitan Pension Fund Employee (8.6%); Employer (18.06%)
- Municipal Gratuity Fund Employee (8.6%); Employer (18.6%)

An amount of R2,221,348 (2010: R1,787,840) was contributed by council in respect of councillors and employees retirement fund. These contributions have been expensed and are included in employee related costs for the year.

Thembelihle Local Municipality

Financial Statements for the year ended 30 June 2013

Notes to the Financial Statements

Figures in Rand 2013 2012

39. Contingencies

Alcedo Engineers

Discussions are in process with regards to a claim by Alcedo Engineers for R 990,000. The amount is not accurate as it relates to inventory provided for by Alcedo with regards to the completion of the project for the refurbishment of the main intake. The amount can not be reliable estimated as the municipality is uncertain of the inventory that it will be able to use for the completion of the project and have not yet had discussions with Alcedo or the new supplier in this regard

Landfill sites

The Municipality has two active landfill sites. It has been identified that the landfill sites situated in Hopetown and Strydenburg are not licensed as required by the National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008).

In accordance with section 68(1) of the National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008), a person convicted of an offence referred to in section 67(1)(a), (g) or (h) is liable to a fine not exceeding R10 000 000 or to imprisonment for a period not exceeding 10 years, or to both such fine and such imprisonment, in addition to any other penalty or award that may be imposed or made.

Ursa Civils CC -.

The municipality isfacing claims of R90 000 from Ursa Civils for breach of contract.

Contingent liabilities - Environmental Act

In terms of the EnvironmentalAct, the municipality is responsible for a number of environmental related transactions that may take place in its jurisdiction. This give rise to contingent liabilities. However, the nature of such transactions cannot be estimated both financially and the number of occurrence, if any are to occur. Whilst the municipality is not aware of such liabilities, the following are the key transactions:

- contingent liabilities relating to fines that may be imposed by the Department of Environmental Affairs as a result of illegal dumping by the municipal residents.
- penalties relating to raw sewerage or sewerage not properly treated being released to the nearby rivers or dams.
- penalties relating to lack of proper security at the municipal's dumping site or lack of monitoring waste being dumped there as some waste should be dumped in certain specified ways so as to avoid related healthy hazards e.g. medical waste.

42. Prior Period Errors & Change in Accounting Policies

A number of correction were made to the prior years' financial statements as a result of prior period errors and/or changes in the reporting framework (Changes in Accounting Policies). Where applicable, the corrections and/or changes were adjusted retrospectively, unless otherwise stated. These corrections/changes resulted in the following adjustments:

Thembelihle Local Municipality

Financial Statements for the year ended 30 June 2013

Notes to the Financial Statements

Figures in Rand 2013 2012

44. Risk management

Financial risk management

The municipality's activities expose it to a variety of financial risks: market risk (including fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

The Council audit committee overseas the monitoring of compliance and oversight of the municipality's risk management framework. The Council a Risk management Committee which is responsible for developing and monitoring the municipality's risk management policies.

The shared audit committee oversees the monitoring of compliance with the municipality's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the municipality. The audit committee is assisted in its oversight role by the municipality's internal audit unit.

Liquidity risk

Ultimate responsibility for liquidity risk management rests with the Council and the finance committee which has built an appropriate liquidity risk management framework for the management of the Municipality's short, medium and long-term funding and liquidity management requirements. The Municipality manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities. The Municipality also gets funding from the National and provincial governments which help to ease the pressure of any liquidity crisis.

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

Cash flow forecasts are prepared and adequate utilised borrowing facilities are monitored.

Interest rate risk

The municipality's interest rate risk arises from long-term borrowings. Borrowings issued at variable rates expose the municipality to cash flow interest rate risk. Borrowings issued at fixed rates expose the municipality to fair value interest rate risk. During 2013 and 2012, the municipality's borrowings at variable rate were denominated in the Rand.

Credit risk

Credit risk consists of cash deposits, cash equivalents and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. The municipality cannot, however, limit the rate at which it can offer services to its stakeholders as it has a constitutional mandate to offer these services.

Trade receivables are presented net of an allowance for impairment.

In terms of the Credit Control and Debt Collection Policy, customers whose accounts become in arrears, collection of such accounts should be done through levying penalty charges, issuing demands for payment, restricting service and handling customers over for collection. However, during the current year proper procedures were not enforced to collect amounts amounts owing to the Municipality. Management is in the process of establishing procedures to be implemented by the credit control function to improve debt collection.
